This product has been tested by Green Grower Labs using valid testing methodologies and a quality system as required by state law. Values reported relate only to the product tested. Green Grower Labs makes no claims as to the efcacy, safety or other risks associated with any detected or non-detected levels of any compounds reported herein. This Certicate shall not reproduced except in full, without the written approval of Green Grower Labs. Flower samples received are homogenized before testing by a liquid nitrogen, then separated for the required field of testing. The results in this report relate only to the sample tested. All measurements have a degree of uncertainty. As required per WSR-17- 12-032 the estimation of uncertainty has been calculated and reported here as a range. The range assumes a 95% condence interval

aPermethrins should be measured as cumulative residue of cis- and trans-permethrin isomers (CAS numbers 54774-45-7 and 51877-74-8 respectively).

 $[{]f b}$ Action level applies to marijuana concentrates, marijuana extracts, intermediate products, and imported cannabinoids.

C Pyrethrins should be measured as the cumulative residues of pyrethrin 1, cinerin 1, and jasmolin 1 (CAS numbers 121-21-1, 25402-06-6, and 4466-1-2 respectively).
